Copilot for Microsoft 365

Architected to access to your business content and context

The Microsoft Graph

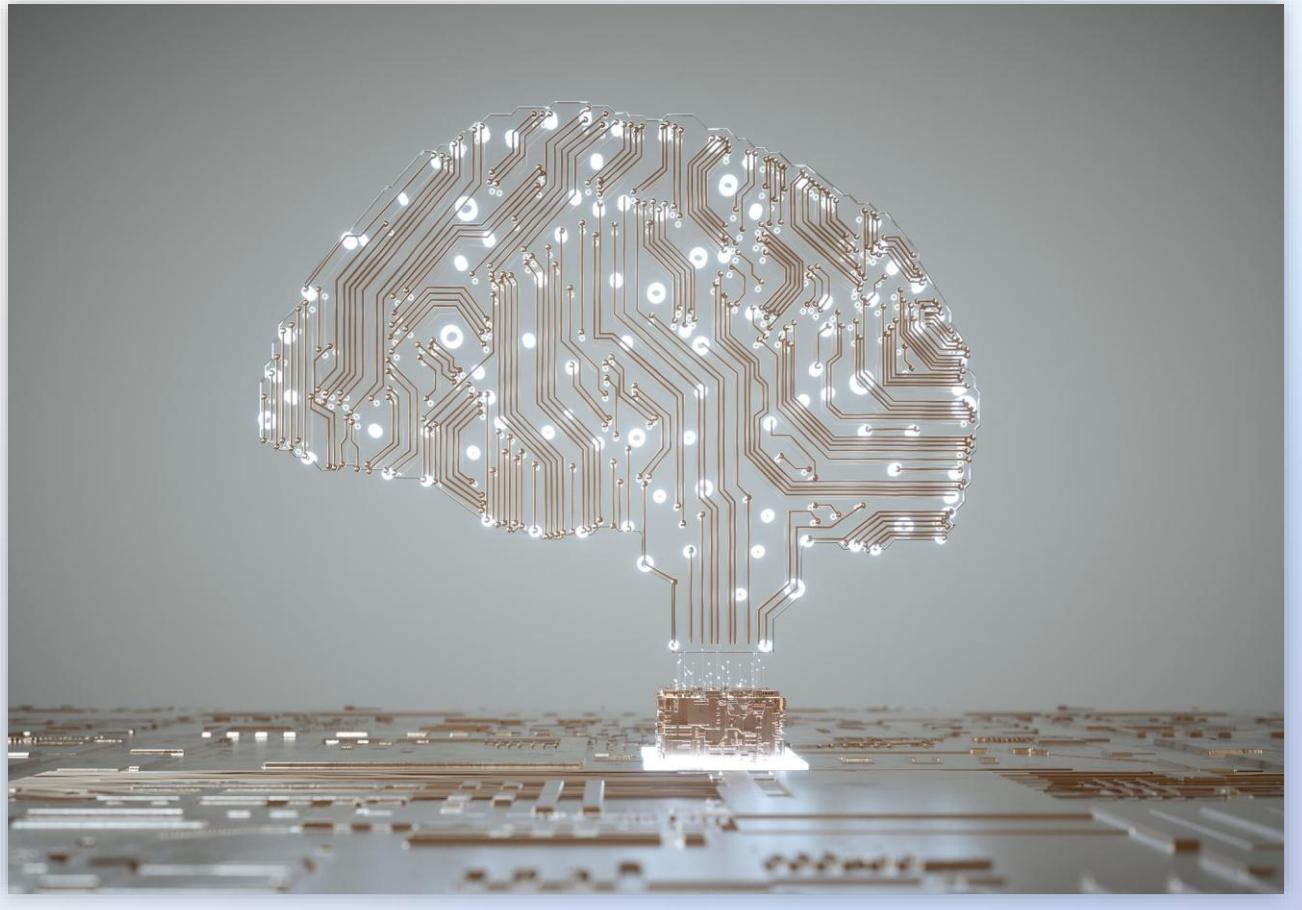

The Microsoft Graph is the **gateway to data and intelligence in Microsoft 365**. The Graph uses a unified programmability model to access data across Microsoft Cloud Services including Microsoft 365 core services, Enterprise Mobility + Security, Windows services, and Dynamics Business Central

- **Graph API** - single endpoint for real-time access to internal data
- **Graph Connectors** - delivers external data to the Microsoft graph (e.g. Salesforce, Jira, etc)
- **Graph Data Connect** – Secure and scalable bulk data access to the Azure AI platform to enable insights and analytics

Semantic Index

The semantic index **sits on top of the Microsoft Graph** to interpret user queries and to produce sophisticated, meaningful, and multilingual responses that help you to be more productive.

- Technology that powers the search functionality in Copilot for Microsoft 365
- Uses artificial intelligence and natural language processing to understand the meaning behind the words used in search queries, allowing for more accurate and efficient search results
- Able to recognize synonyms, related concepts, and other factors that can help refine search results, making it easier for users to find the information they need
